Business Overview

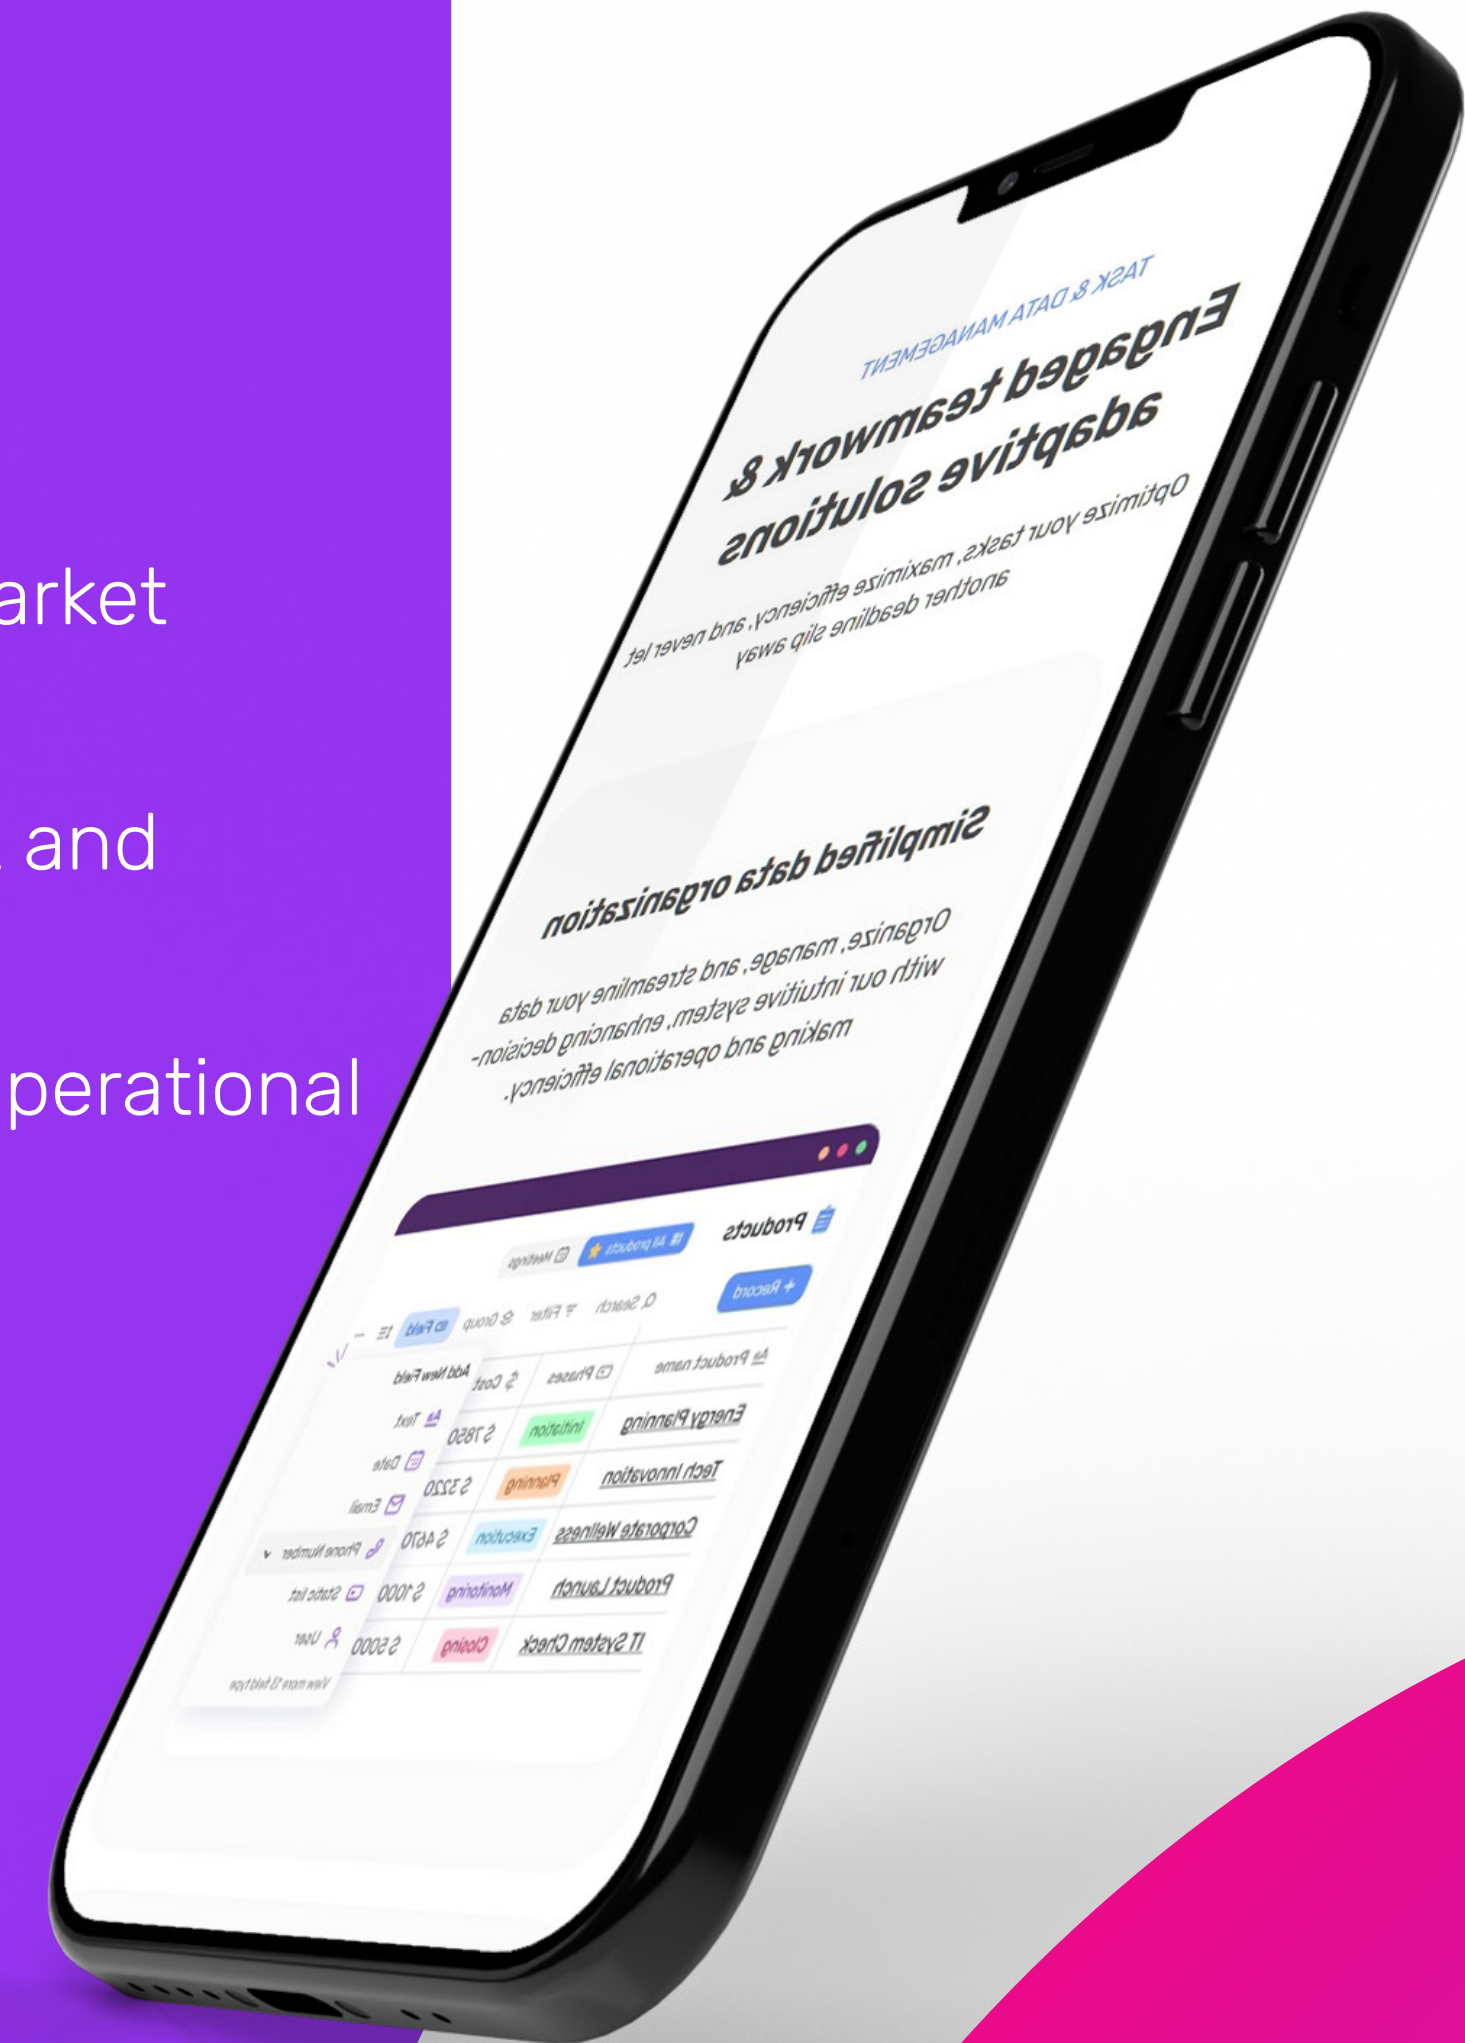

The problem Workiom is solving

Companies Must Compete to Survive

Adapting Quickly to Market Dynamics: Businesses need swift, cost-effective adaptation to market shifts, often impeded by time and financial investment.

IT Department Overload: Constant projects often lead to delays in new software development and system integration for IT departments.

Essential Digital Workspace: In the post-COVID era, a digital workspace is crucial not just for operational agility, but also for retaining employees who seek flexible and modern work environments.

What is Workiom

Workiom is a flexible digital platform designed to streamline team tasks, data and automate processes.

Digital Process Creation: It enables team leaders to digitize and build their own solutions and processes with ease, eliminating the need for in-depth technical skills. This accessibility allows for innovation and optimization in the workspace by a diverse range of users.

Team and Task Oversight: Workiom provides essential tools for the efficient management and monitoring of teams and tasks. This feature ensures smooth operational flow and enhanced productivity, leading to more effective task completion.

Data Handling: The platform includes a user-friendly system for setting up, managing, and organizing data. This approach to data management simplifies data operations, making it easier and more effective for users to handle information.

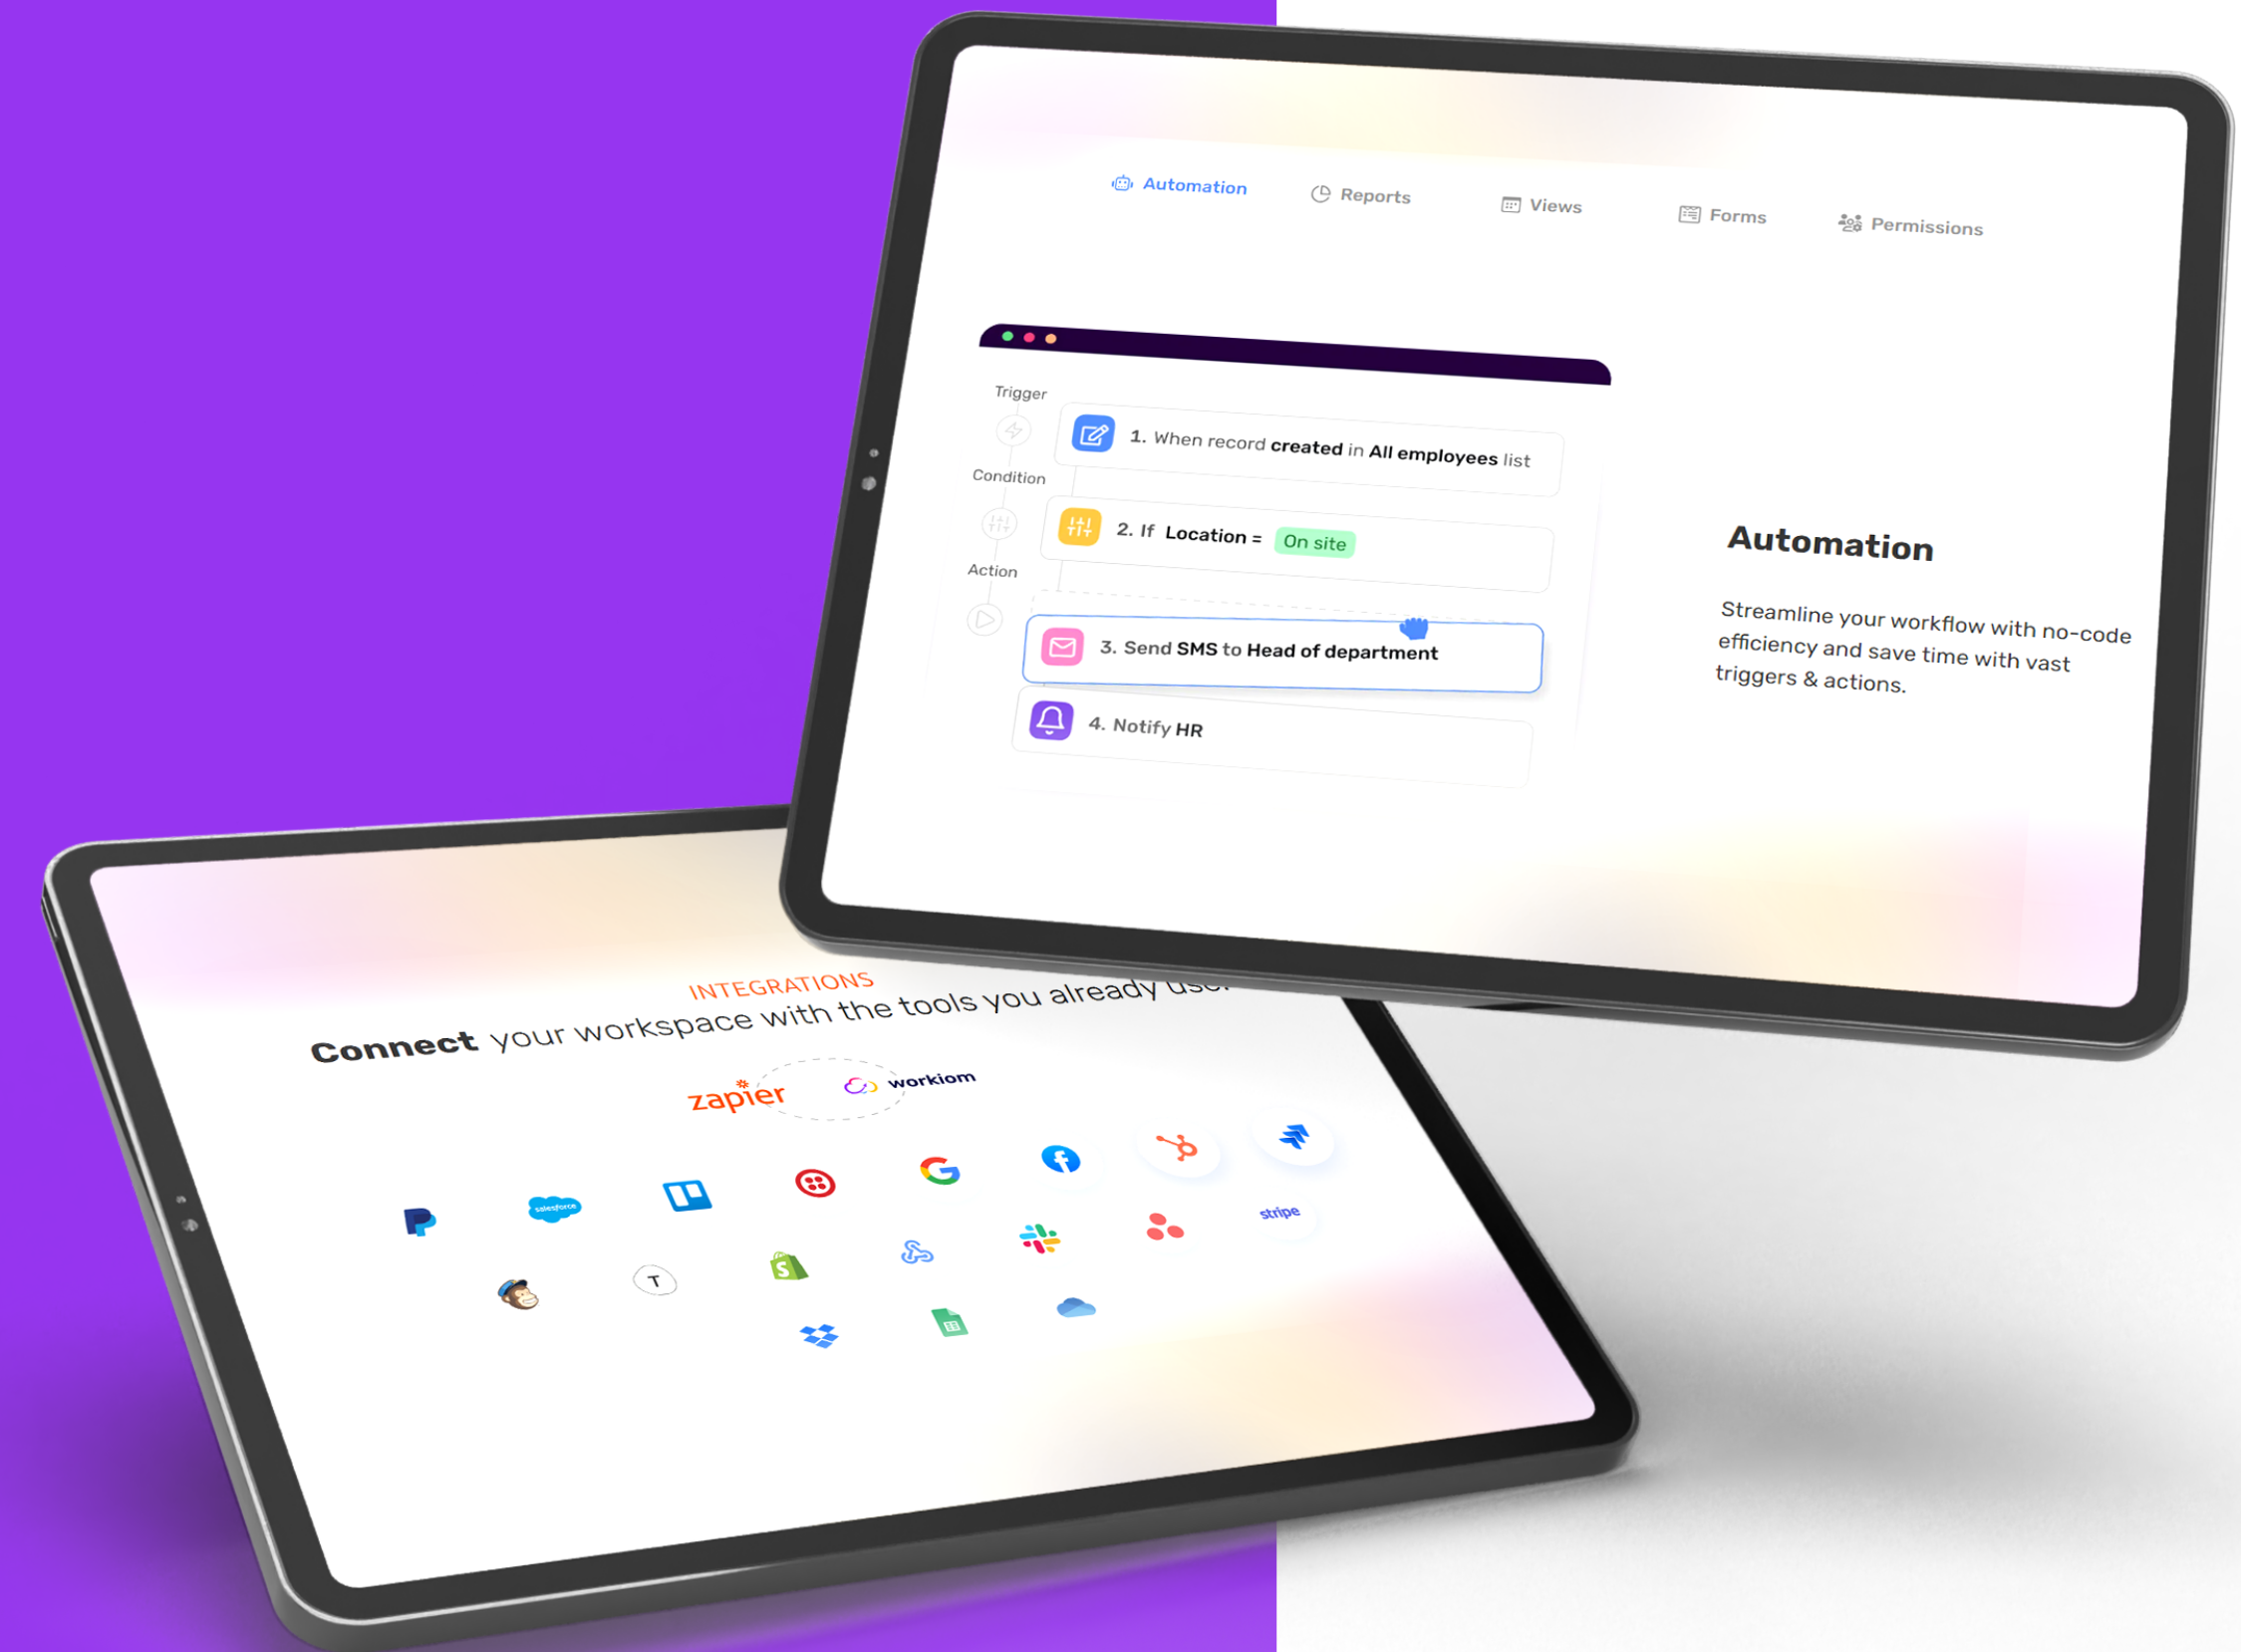

Mission

Empower businesses with an intuitive digital platform to streamline task management, data organization, and process automation, fostering innovation and operational efficiency.

Vision

Become a global leader in digital workspace solutions, revolutionizing how organizations manage, automate, and optimize their operations for a future of agile and efficient workplaces.
